Lancelot Ector

Report from the Investment Manager

Dear Shareholders,

Lancelot Ector (the "Company") was established as an umbrella fund on 28th February 1996.

Total subscriptions to the Master Fund, initially launched on 13th March 1996, at SEK 10,00 per share, amount to 9,323,525.955 capitalisation shares and 9,196,506.247 distribution shares as of 30th June 2023, representing total assets of SEK 545,218,914. The net asset value per capitalisation share was SEK 38.93 i.e., increase of 289.3% after fees from launch date and increase of 2.58% during the first six months of 2023.

The Master Fund is a so-called balanced fund, which seeks to achieve positive inflation-adjusted capital growth over time. The asset allocation is flexible with the equity part invested in Swedish and international stock market listed shares. The bond portion of the portfolio shall to a considerable extent be invested in Swedish bonds with low credit risks.

Global economy and financial markets (market review)

The first half of 2023 was characterised of high inflation in the western hemisphere and as a result steep increases in central bank rates, but positive stock markets and declining volatility. Despite a banking crisis in March, where several regional banks in the US were subject to a run or restructuring, stock and credit markets quickly recovered lost ground.

The first half of 2023 was almost a reverse of 2022 in terms of stock market and sector returns, where Swedish stocks returned 12.1% and global stocks returned 19.1% in Swedish krona. Sector wise, the previously beaten down global Technology sector returned 43.9%, Consumer Discretionary 33.5%, and Communication Services 34.2%, while the defensive sectors Health Care returned 4.6% and Consumer Staples 7.9%.

Similar pattern is clear considering stock market styles, where Growth stocks, which had a tough 2022, returned 31.5% during the first half of 2023 and Quality stocks 25.5%. Value stocks, on the other hand returned more modestly 8.2% and Low volatility stocks 7.4%.

Interest rates increased during the period, short as well as long rates, of the back of stubbornly high inflation numbers. For example, the Swedish 5-year government bond yield increased from 2.5 to 2.8%, contributing to a negative 0.6% return for government bonds. Floating rates notes, a sector to which Lancelot Ector allocates around two thirds of the bond portfolio, benefitted from increased short rates. During the period, 3-month STIBOR increased from 2.7% to 3.8%, driving the 2.8% return of the Floating rate note index.

The Swedish krona depreciated during the period against most major currencies, such as the US dollar (3.5%), British Pound (8.8%), Euro (5.5%) and Swiss Franc (6.8%). This benefitted Lancelot Ector, which don't hedge the foreign currency exposure of global stocks into Swedish krona.

The Fund (performance review)

The contribution to Lancelot Ector's return of 2.6% during the first half of the year was about equally split between the equity and fixed income allocations of the fund.

The fund manager was active in asset allocation changes during the period. The stock weight was 27% in the beginning of the year due to a relatively bright outlook for stock markets but gradually decreased to about 22% at the end of the period as the market became more expensive. New sectors were added to the fund's stock portfolio during the period to diversify more into infrastructure, technology, communication services, consumer discretionary and consumer staples. Currency exposure to the US dollar and Euro increased during March, as foreign stock holdings were added to the portfolio. The Swedish krona depreciated during the period, contributing to return. Interest rate duration increased from 1.1 years to 1.5 years at the end of the period, to diversify the fund's bond holdings. The corporate bond weighing in the fixed income portfolio increased while mortgage bonds decreased, to improve issuer diversification and yield.

Lancelot Ector

Report from the Investment Manager (continued)

Lancelot Ector's share portfolio is focused on stable companies with low debt, increasing dividend, proven business models and low valuations, and is diversified geographically as well as sector wise. The individual shares which contributed most positively to Lancelot Ector's return in the first half of 2023 were Alphabet (new holding, +31.5%), Ares Management (new holding +27.2%) and Volvo (+27.0%). The companies that gave the largest negative return contribution were Hufvudstaden (-9,6%, sold), Ericsson (-7.8%, sold) and Danaher (-7.0%, sold).

The individual bonds that contributed most positive to Lancelot Ector's return in the first half of 2023 was Swedavia (+5.3%), Castellum (new holding, +4.1%) and Open Infra (new holding, +4.6%). The bonds that gave the largest negative return contribution were Loomis (new holding, -1.2%), Getinge (new holding, -1.4%) and LF Bank (-0.7%). For those stocks and bonds which provided a negative profit contribution, as well as all other holdings in Lancelot Ector for that matter, we have full confidence about positive contributions to the fund during the second half of 2023.

As of 30th June 2023, the Swedish equity exposure amounted to 6.6%, international equity exposure amounted to 15.0%, bonds amounted to 65.2% and cash amounted to 11,8% of total net asset value.

Outlook for the second half of 2023 for the market and for Lancelot Ector

Looking ahead six to twelve months, our base case scenario is that inflation will decline but it will take time before it reaches 2%, not least in Sweden which has one of the highest inflation rates in the western hemisphere. Hence, we believe in higher short interest rates in Sweden during the rest of 2023 and 2024, which in turn is an important decision variable of our equity and bond allocation as well as the composition of the bond portfolio.

Even though stocks have delivered healthy returns during the first half of 2023, we are relatively constructive of the asset class going forward as we believe companies might continue to beat low earnings expectations. However, we put a significant probability of our alternative scenario, which would be a deep global recession, or inflation rates that don't come down in line with expectations. We are mindful of the latter scenario, meaning that we remain cautious regarding the fund's stock weighting for now.

Lancelot Ector's stock portfolio has a p/e ratio of 13.0 for 2023 and a profit growth of 8.7% combined with a dividend yield of 3.8%. We believe the stock portfolio is attractively valued and combined with the fixed income portfolio yield of 5.9% we believe Lancelot Ector is well placed to deliver on its target over the long term.
